## What Works Best for ERP?

Presented by:  
Faun deHenry  
FMT Systems Inc.

# Agenda

- ❑ Introduction
- ❑ State of training today
  - Current Trends
  - 2011 Predictions
- ❑ ERP training
  - Uniqueness
  - Considerations
  - Tools available
- ❑ Conclusion
  - Summary
  - Resources and references
  - Q & A

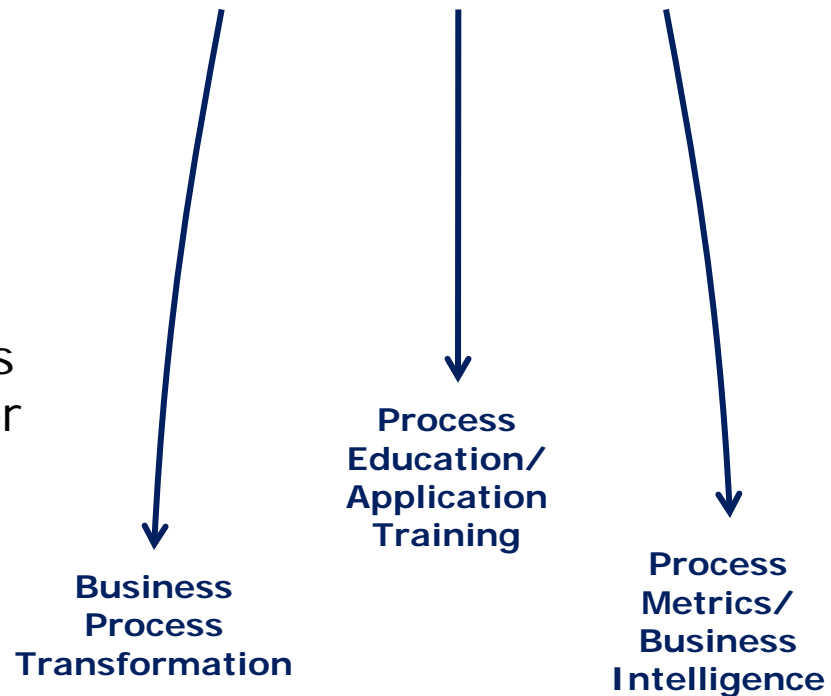

# Introduction

## Faun deHenry

- ❑ CEO of FMT Systems Inc.
- ❑ Initiated with Anne Ristau  
OAUG's eLearning Program
- ❑ Chair, OAUG Education  
Committee, 2002 – 2005
- ❑ OAUG BI Track Chair –  
Collaborate 07, 08, 09
- ❑ Recognized speaker on topics  
including Designing Customer  
Focused Processes, Best  
Practices for Virtual  
Organizations, and business  
intelligence.
- ❑ Memberships in ASTD,  
eLearning Guild, and IPAPI

## FMT Systems Inc.

### Business Process

# State of Training Today

## TRAINING AND TECHNOLOGY

# Training Becoming Learning

“A shift is taking place **from training** — an instructor-led, content-based intervention — **to learning**, which is a self-directed, work-based process leading to increased adaptive capacity.” [emphasis added]

Clive Shepard (<http://clive-shepherd.blogspot.com/>)

# Current Predictions

1. Total spending for training services will increase by an estimated 7-9%.
2. The role of the learning leader is shifting from being a program manager to a solution architect.
3. Learning content will be transformed for easier consumption.
4. Success metrics for learning will be based on content access, views, involvement and downloads.

# Current Predictions

5. Learning portals will become the next big training technology solution.
6. Look for a greater emphasis on partnerships between corporate training services and community colleges.
7. More companies will convert to project-based learning initiatives.
8. The creation of user-generated content will continue to grow.
9. Expect a surge in M&A activity.

# Training Industry Trends

1. Transactional Networking
2. More organizations demanding greater interaction and more learner centered class room activities
3. True blended learning
4. Big upswing in mobile learning due to emergence of iPad competitors
5. Video sharing for learning

# Training Industry Trends

6. More eLearning that doesn't work
7. New focus on change management
8. Discussions about resilience as opposed to stress management
9. Rise of coaching, as an additional learning modality

# Trends — Hacking Work

We are going to see more and more employees taking initiative to end run the barriers in order to leverage networks, communities, and tools that extend beyond the boundaries of the organization. Lots of managers will choose to look the other way.

From blog post of Dr. Tony Karrer, CEO/CTO of TechEmpower

# Trends — Social Learning

Address challenging work problems by forming quick, virtual discussions that draw on that expertise.

From blog post of Dr. Tony Karrer,  
CEO/CTO of TechEmpower

# ERP Training

## TRAINING AND TECHNOLOGY

# ERP is about . . .

The future of ERP is **about embracing new business processes, including innovation and change management**, about new ways of interacting with ERP through visualization, and about a different kind of collaborative relationship between vendors, resellers, and customers — one focused on knowledge management and the development of shared innovation capital.

*ERP vendors: Innovate or Die!*

By Stewart McKie, European Analyst Director at Ventana Research

ERP is not about software, but **about changing the way the organization and its operations are managed.**

David A Collier, University of Texas at El Paso

"It's not about software, **it's about business processes.**" Susan

Driscoll, former COO of Bedford, Freeman Worth

# Why Is ERP Training Different?

## An ERP system . . .

- ☐ Touches every part of the business
- ☐ Drives change regarding how an organization conducts its business
- ☐ Automates, or partially automates, business processes
- ☐ Changes job duties and responsibilities

## Which Means That Training Must . . .

- ☐ Address data flow and integration handled by the software
- ☐ Assist and support enterprise change management initiatives
- ☐ Include business process education
- ☐ Support efforts to learn new skills

# ERP Training Considerations

- ❑ Audience
- ❑ Learning styles
- ❑ Budget versus cost
- ❑ Subject Matter Experts (SMEs) versus Instructional Designers (IDs)

# Training Tools Available

Source: The eLearning Guild Research

*Figure 12 – Rapid e-Learning Development tools product and company market share results for corporations as of December 3, 2007 (based on minimum of 25 responses).*

# Conclusion

## TRAINING AND TECHNOLOGY

# Summary

- ❑ The economy will force organizations to find more efficient means for learning.
- ❑ While classroom instructor-led training predominates in some industries, use of Learning 2.0 modalities is increasing.
- ❑ Although ERP training/learning is unique, it is still part of the larger training/learning arena.
- ❑ Learning is about knowledge, not tools!
